

# HTRT-KIT

Thank you for purchasing the High-Temp ring terminal kit. Below, you will find helpful information regarding recommended crimp tooling and heat shrink tubing to insulate the wire barrel.

## Recommended Heat Shrink Sizes

- 1/8" (22-18 AWG)
- 3/16" (16-14 AWG)
- 1/4" (12-10 AWG)

## Recommended Heat Shrink

- SCL 3:1 adhesive lined rigid tubing Prowireusa favorite
- W5DL 3:1 adhesive lined rigid tubing
- ATUM either 3:1 to 4:1 variants
- CPA-100 Or 3635W

## Recommended "W" Crimp Tooling

- 3125-CT most cost effective tool, see notes below

Professional Grade Tooling

- 49935 TE Hand Tool
- 58545-1 TE Pro-Crimper die set only no tool
- 58546-1 TE Pro-Crimper with die set

## NOTES

When using the 3125-CT on these 22-18 AWG terminals you will need to crimp 2 times due to stiffness of these terminals

- Crimp #1 Teeth of tool toward the seam of terminal
- Crimp #2 Rotate terminal 180° and crimp again
